

Failure Mode & Effect Analysis Workshop

In this 4-hour workshop, learn how to identify potential failure modes and effectively evaluate them and plan for action to prevent them from occurring. In addition, the differences between "Process" and "Design" FMEA's will be explained. Hands-on exercises are given. This workshop is based on the AIAG publication "Potential Failure Mode and Effects Analysis"

Outline

- > Workshop Objectives
- > FMEA Objectives
- > FMEA Success Factors
- > When Are FMEA Generated?
- > Design vs. Process FMEA
- > The FMEA Development Flow
- > Follow-up Actions
- > Workshop Exercises

Who Should Attend?

Quality Engineers, Technicians, and Supervisors, R&D Engineers, Project Engineers, and/or other associates with responsibilities to prepare and interpret FMEAs
